- <sup>1</sup> The list of major disciplines and degree programs, for admission to study which the applicants are required to undergo compulsory initial medical examination (checkup):

### **Higher Education:**

13.03.01	Heat Power Engineering and Heat Engineering
13.04.01	Heat Power Engineering and Heat Engineering
21.05.04	Mining
13.03.02	Electrical Power Engineering and Electrical Engineering
13.04.02	Electrical Power Engineering and Electrical Engineering
14.03.01	Nuclear Power Engineering and Thermal Physics
14.03.02	Nuclear Physics and Technology
20.05.01	Fire Safety
23.03.01	Technology of Transport Processes
23.03.02	Land Transport and Technological Complexes
23.03.03	Operation of Transport and Technological Equipment and Systems
44.03.01	Pedagogical Education
44.04.01	Pedagogical Education
44.03.02	Psychology and Pedagogical Education
44.04.02	Psychology and Pedagogical Education
44.03.03	Special (Defectological) Education
44.03.05	Pedagogical Education (with dual specialization)
30.05.01	Medical Biochemistry
30.05.02	Medical Biophysics
31.05.01	Medical Care
32.04.01	Public Health Care
33.05.01	Pharmacy
19.03.02	Foodstuffs of plant origin
19.04.02	Foodstuffs of plant origin
19.04.03	Foodstuffs of animal origin
19.03.04	Technology of Production and Organization of Public Catering
19.04.04	Technology of Production and Organization of Public Catering
19.04.05	High-tech Production of Foodstuffs of Functional and Special Purpose

### **Secondary Vocational Education:**

050144	Preschool Education
050146	Teaching in Primary Classes
151031	Installation and Technical Operation of Industrial Equipment (by industry)
180407	Operation of Marine Electrical Equipment and Means of Automation
280703	Fire Safety

---

- <sup>2</sup> The required findings of the medical specialists and the volume of clinical, laboratory and functional tests, to be stated in the medical certificate (report):

**For juveniles:**

- medical specialist findings by:  
pediatric physician, children's surgeon, children's dentist, children's endocrinologist, neurologist, traumatologist, ophthalmologist, otolaryngologist, and findings of other medical specialists subject to specific indications;
- the volume of clinical, laboratory and functional tests:  
complete blood count, urinalysis, measurement of blood glucose, electrocardiography, chest X-ray, information about vaccinations, and other tests subject to specific indications.

**For adults:**

- medical specialist findings by:  
therapist, neurologist, ophthalmologist, surgeon, otolaryngologist, and findings of other medical specialists subject to specific indications;
  - the volume of clinical, laboratory and functional tests:  
complete blood count, urinalysis, measurement of blood glucose, electrocardiography, chest X-ray, information about vaccinations, and other tests subject to specific indications.
