01

Introduce DBpia

What is DBpia?

- DBpia is a Korean academic journal platform
- DBpia provides full-text and bibliographic information of all the academic materials by online service.
- Find out research themes, academic papers, and the recent trends of studies from DBpia!

2,300 of Publishers

Academic Society, National
Research Institution, etc

4,000 of Journals

Academic Journals,
Conference Materials,
Magazines, etc.

300 million of Academic
Contents

Academic papers,
Articles, Symposium
Abstracts, etc.

DBpia Membership

General Member

- A user can register individually as a member of DBpia.
- A user can use personalization provided in DBpia
- Everyone is free to be a member of DBpia without charge.
 - Naver/Google/Facebook accounts are available to register and login.
- After login as a member, please check your institutional access to use the DBpia for free

Author Member

- A user is who already wrote an article or planning to write an article.
- An author member can check the usage performance of their own research on the author's page.
- The author member can also use personalization provided in DBpia.

02

Institutional Authentication

- If certify affiliated institution in DBpia, free to use all the academic contents.

Institutional Authentication on Campus

- Use the PC on your campus that IP registered for the access of DBpia.
- Your institution is automatically certified via the IP authentication.

Institutional Authentication for Off-Campus

- Find and click the DBpia link on your library website.
- log in via your library's account and get the institutional access of DBpia.

03

Find an article

- Find the desired article by the convenient search functions

General Keywords Search

- Type more than two words rather than one word to have accurate results.
- After the keywords search, check the 'Filters applied' to have more specific results.
 - If there are too many articles on the search result, click the option on the left side.
 - Reduce the search result by 'Issue Year', 'Subject', 'Journal', 'Type', etc.

The screenshot shows the DBpia search results page. A red dashed box highlights the search bar at the top, which contains the text 'library' and a search icon. Another red dashed box highlights the 'Filters applied' sidebar on the left. This sidebar includes sections for 'Issue Year', 'Subject' (with a list of categories like Social science, Library and Information Science, etc.), 'Journal' (with a list of journals like 한국도서관·정보학회지, etc.), and 'Type'. The main content area shows 'Recommended Journals' with five journal covers, followed by a 'Results' section. The results section displays a list of search results, including academic journals and proceedings, with details such as titles, authors, and publication information. The results are sorted by 'Relevance'.

Related Keywords Search

- Check the 'Related keywords' to see what other researchers looked up !

Author's Name Search

- Search articles by an author's name.
 - On the search box, check the 'Authors' options before type author's name.
 - The search result will come up when the name of the author exactly matched.
 - Besides, title, title+abstract, and keyword can use to search for articles.

DBpia

The screenshot shows the DBpia search interface. On the left is the DBpia logo. To its right is a search box with a dropdown menu. The dropdown menu is open, showing options: All, Title, Title+Abstract, Authors, and Keyword name. The 'Authors' option is highlighted in blue. To the right of the dropdown is a search button with a magnifying glass icon. Further right is the text 'Advanced Search'.

Abstract

O2O(Online to Offline) 세상을 기반으로 한, 초연결지능사회인 제4차 산업혁명 시대가 시작됐다. 본 연구 도입부에서는 제3차 산업혁명에서 제4차 산업혁명으로 넘어가면서 발생할 일자리의 문제점을 분석한다. 전통경제 사회에 O2O 융합경제라는 새로운 경제모델이 등장하며 최근 몇 년 사이 법과 규제를 포함한 다양한 충돌이 발생했다. O2O는 선택은 온라인에서 하고 오프라인에서 거래하는 단순한 '키머스' 형태로 끝나지, 제4차 산업혁명에서는 빅데이터·클라우드·인공지능기술 등이 결합하며 실시간으로 소비자에게 최적화된 편의를 제공하는 '서비스' 형태로 변화하고 있다. 제4차 산업혁명에 대한 연구는 이제 시작 단계다. 본 연구에서는 제4차 산업혁명이 본격화되면서 펼쳐질 세상을 분석, 전망하고 가장 큰 위협으로 꼽히는 일자리

Fourth Industrial Revolution Impact: How it Changes Jobs
Shang He Ahn* · Min-Hwa Lee**

Abstract :
We are at the beginning stage of a Fourth Industrial Revolution, a hyper-connected society based on O2O(Online to Offline). It's a revolution of AI(artificial intelligence). Beginning of this research, it will analyze new types of economy patterns and problems that have occurred as we move from the Third to the Fourth Industrial Revolution. While the world is changing through innovation, there is also concern, since innovation shakes the central axis of the existing economy. While facing a sharing economy, it came into conflict with existing regulatory frameworks from the traditional economy. The Fourth Industrial Revolution will bring us a new, optimized world by reinforcing connectivity. At the begging of the O2O industry, it was simply a type of commerce which connected online-to-offline or offline-to-online. It is now developing as a O2O service, by combining new technologies such as big data, cloud, AI, which provides consumers optimized convenience in real-time. However, there is not much research about the Fourth Industrial Revolution based on O2O. We should plan our future. This research discusses how to respond to the Fourth Industrial Revolution, especially focusing on how it will effect the future of jobs. First by undertaking a literature review it will show that throughout history there was no jobless eventually due to an Industrial Revolution. It will also anticipate new types of demand and desire through analysis. AI and O2O will bring experience economy. People will pursue their needs to fulfill their desires for happiness and self-realization. Their needs, moving from consuming goods to spiritual happiness and self-realization will bring new types of jobs.

[Keywords] Fourth Industrial Revolution, hyper-connected society, O2O, artificial intelligence, job, Maslow's hierarchy of needs

My Library : Manage the Articles

The screenshot displays the DBpia 'My Library' interface. At the top, the DBpia logo is on the left, and navigation links for 'All', 'Keywords, Journals, Societies, Authors', 'Advanced Search', 'Library', and 'Notifications' are on the right. The main content area is divided into 'My Library' and 'All Bookmarks'. The 'My Library' section shows a list of bookmarks: 'Korean Articles (3)', 'English Articles (3)', 'Final assignment (2)', and 'Essay (1)'. A red box highlights the 'Add Document' button in the 'All Bookmarks' section. A red dashed box outlines the '등록' (Register) modal window, which includes a '자료유형 선택' (Select Resource Type) dropdown menu with options: 'Journal Article', 'Book', 'Web Page (Other)', and 'Thesis'. The '등록' form contains fields for Type, Title, Authors, Journal/Publication, Issue Month, Volume, Issue, Pages, Publisher, DOI, URL, and Notes. A red box highlights the '수정' (Edit) button in the 'All Bookmarks' section. A red dashed box outlines the '수정' (Edit) modal window, which contains the same fields as the '등록' form. Red arrows indicate the flow from the 'Add Document' button to the '등록' form, and from the 'Edit' button to the '수정' form.

Register new bibliographic data of an article in my library.

Edit the registered bibliographic data of the article.
(The edited information can check in my library Only)

My Library : Categorize the Articles

- Categorize all the articles into the folders by drag and drop or click the folders option.
 - An article can put into several folders.

The screenshot displays the DBpia 'My Library' interface. At the top, there's a navigation bar with the DBpia logo, a search bar, and links for 'Advanced Search', 'Library', and 'Notifications'. The left sidebar, titled 'My Library', contains a list of folders under 'All Bookmarks (5)': 'Korean Articles (3)', 'English Articles (3)', 'Final assignment (2)', and 'Essay (1)'. Below this are links for 'Manage Folders', 'Recommendations for Me', 'Viewed Articles', 'Manage Reviews · Notes', 'Alerts Settings', and 'Citation Style Settings'. The main area, titled 'All Bookmarks', shows a list of bookmarked articles. The first article, 'Fourth Industrial Revolution Impact : H...', is highlighted. A red dashed box labeled '2' is over the 'Assign to the following folder' dialog box, which shows checkboxes for 'Korean Articles', 'English Articles', 'Final assignment', and 'Essay'. A red arrow labeled '1' points from the 'Folders' button in the article's action bar to the folder list in the sidebar. Another red arrow points from the text 'Check where the article is organized.' to the 'English Ar...' folder in the sidebar. The article list includes details like 'dissertation | Accessible', author names, titles, and usage statistics.

Check where the article is organized.

My Library : Manage the Folders

- Manage all the folders by clicking the "Manage Folders" in the Library.

Differences in brain signal complexity between experts and novices when solving conceptual science problem: a functional near-infrared spectroscopy study

Laipeng Jin ^{a, b, c}, Huibin Jia ^{a, b, c}, Huayun Li ^{a, b, c}, Dongchuan Yu ^{a, b, c, d}

<https://doi.org/10.1016/j.neulet.2019.02.015>

Get rights and content

Highlights

- PE was used to distinguish students with different results of conceptual change.
- The PE value of experts was significantly smaller than that of novices in the rIFC.
- fNIRS can be used as a brain imaging tool for assessment of conceptual change.

Abstract

Assessing the result of conceptual change (i.e., whether an individual has come to correctly understand a science concept) is important in science education, however
